About Andale’s range of Mobile Bar and Portable Beer Systems...

The team at Andale have been manufacturing, supplying and installing our range of Australian made beer dispensing equipment since 1946. Over the years our range of Mobile Bar and Portable Beer Systems have grown to become the most comprehensive in Australia.

Andale’s range of mobile bars is second to none. Made from the highest quality materials and components, our Mobile Bars are professionally fitted by our factory trained technicians and are designed to last.

Andale’s range of portable beer systems are the ideal solution for anyone who wants a simple and convenient beer system without the cost. Our range of Cold Plate coolers are designed to operate without electricity, yet still deliver icy cold beer. Andale have a portable beer cooler for every application. From coolers for professional keg hire companies, Australia’s breweries to the home enthusiast, Andale have a portable beer system to suit everyone’s needs.

Andale also stock and provide Australia’s largest range of beer dispensing products and service. Our products and services include:

Cold Plate Coolers

Andale have the largest range of Cold Plate Coolers in Australia. We have a model in our range to suit many needs and applications. All of our Cold Plate Coolers are available in single or double configurations and are also available in a pack complete with a tap or beer gun, gas regulator and keg coupler.

A Cold Plate Cooler is a simple and convenient way to dispense ice cold beer anywhere, any time. All you need to do is fill the Cooler with ice and the ‘Cold Plate’ inside the cooler acts as a heat exchanger which chills your beer. Simple, convenient and portable. Our Cold Plate coolers are used by all of Australia’s major breweries, catering companies and keg hire experts.
